Attrition by Score

● Attrition - Job Satisfaction Score ● Attrition - Work life balance Score

Attrition by Overtime

● No ● Yes

None of the commonly expected drivers — *overtime*, *job satisfaction*, *work-life balance*, or time since last promotion — show a strong standalone relationship with attrition. **Rates stay consistently in the 49–55% range across all segments tested**

Attrition by Income

Attrition by Stock Option Level

Compensation (income, stock options, training) and tenure all show attrition holding **steady in a narrow 47–53%** band, with no meaningful pattern across any variable, confirming that individual employee-level factors alone don't explain attrition in this dataset.
